SUGGESTED IDENTIFICATION

U. S. Bureau of the Census. *U. S. Census of Agriculture: 1954.* Vol. III, Special Reports, Part 2, Ranking Agricultural Counties
U. S. Government Printing Office, Washington, D. C., 1956.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., or any of the Field Offices of the Department of Commerce, 60 cents (paper cover)

PREFACE

Volume III, Special Reports, comprises one of the volumes presenting final summaries and results for the 1954 Census of Agriculture. Part 2, Ranking Agricultural Counties, presents statistics for selected items of inventory and agricultural production for the leading counties of the United States.

The 1954 Census of Agriculture was taken in conformity with the Act of Congress (Title 13, United States Code), approved August 31, 1954, which includes provisions for the mid-decade censuses of agriculture.

The computation of statistics and the preparation of this special report were under the supervision of Ray Hurley, Chief, Agriculture Division, and Warder B. Jenkins, Assistant Chief. They were assisted by Snider W. Skinner, Charles Frazier, Dorothy Richardson, Evelyn Gray, and Henry A. Tucker. The maps were prepared under the supervision of Mr. Clarence E. Batschelet, Chief, Geography Division.

August 1956.

UNITED STATES CENSUS OF AGRICULTURE: 1954

REPORTS

Volume I.—Counties and State Economic Areas. Statistics for counties include number of farms, acreage, value, and farm operators; farms by color and tenure of operator; facilities and equipment; use of commercial fertilizer; farm labor; farm expenditures; livestock and livestock products; specified crops harvested; farms classified by type of farm and by economic class; and value of products sold by source.

Data for State economic areas include farms and farm characteristics by tenure of operator, by type of farm, and by economic class.

Volume I is published in 33 parts as follows:

Part	State or States	Part	State or States	Part	State or States
1	New England States:		West North Central:		East South Central—Continued
	Maine.	8	Minnesota.	21	Alabama.
	New Hampshire.	9	Iowa.	22	Mississippi.
	Vermont.	10	Missouri.		West South Central:
	Massachusetts.	11	North Dakota and South Dakota.	23	Arkansas.
	Rhode Island.			24	Louisiana.
	Connecticut.	12	Nebraska.	25	Oklahoma.
2	Middle Atlantic States:	13	Kansas.	26	Texas.
	New York.		South Atlantic:		Mountain:
	New Jersey.	14	Delaware and Maryland.	27	Montana.
	Pennsylvania.	15	Virginia and West Virginia.	28	Idaho.
	East North Central:	16	North Carolina and South Carolina.	29	Wyoming and Colorado.
3	Ohio.			30	New Mexico and Arizona.
4	Indiana.	17	Georgia.	31	Utah and Nevada.
5	Illinois.	18	Florida.		Pacific:
6	Michigan.		East South Central:	32	Washington and Oregon.
7	Wisconsin.	19	Kentucky.	33	California.
		20	Tennessee.		

Volume II.—General Report. Statistics by Subjects, United States Census of Agriculture, 1954. Summary data and analyses of the data for States, for Geographic Divisions, and for the United States by subjects as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III.—Special Reports

Part 1.—Multiple-unit Operations. This report will be similar to Part 2 of Volume V of the reports for the 1950 Census of Agriculture. It will present statistics for approximately 900 counties and State economic areas in 12 Southern States and Missouri for the number and characteristics of multiple-unit operations and farms in multiple units.

Part 2.—Ranking Agricultural Counties. This special report will present statistics for selected items of inventory and agricultural production for the leading counties in the United States.

Part 3.—Alaska, Hawaii, Puerto Rico, District of Columbia, and U. S. Possessions. These areas were not included in the 1954 Census of Agriculture. The available current data from various Government sources will be compiled and published in this report.

Part 4.—Agriculture, 1954, a Graphic Summary. This report will present graphically some of the significant facts regarding agriculture and agricultural production as revealed by the 1954 Census of Agriculture.

Part 5.—Farm-mortgage Debt. This will be a cooperative study by the Agricultural Research Service of the U. S. Department of Agriculture and the Bureau of the Census. It will present, by States, data based on the 1954 Census of Agriculture and a special mail survey to be conducted in January 1956, on the number of mortgaged farms, the amount of mortgage debt, and the amount of debt held by principal lending agencies.

Part 6.—Irrigation in Humid Areas. This cooperative report by the Agricultural Research Service of the U. S. Department of Agriculture and the Bureau of the Census will present data obtained by a mail survey of operators of irrigated farms in 28 States on the source of water, method of applying water, number of pumps used, acres of crops irrigated in 1954 and 1955, the number of times each crop was irrigated, and the cost of irrigation equipment and the irrigation system.

Part 7.—Popular Report of the 1954 Census of Agriculture. This report is planned to be a general, easy-to-read publication for the general public on the status and broad characteristics of United States agriculture. It will seek to delineate such aspects of agriculture as the geographic distribution and differences by size of farm for such items as farm acreage, principal crops, and important kinds of livestock, farm facilities, farm equipment, use of fertilizer, soil conservation practices, farm tenure, and farm income.

Part 8.—Size of Operation by Type of Farm. This will be a cooperative special report to be prepared in cooperation with the Agricultural Research Service of the U. S. Department of Agriculture. This report will contain data for 119 economic subregions, (essentially general type-of-farming areas) showing the general characteristics for each type of farm by economic class. It will provide data for a current analysis of the differences that exist among groups of farms of the same type. It will furnish statistical basis for a realistic examination of production of such commodities as wheat, cotton, and dairy products in connection with actual or proposed governmental policies and programs.

7 Whole milk sold—100 leading counties in quantity sold, 1954; with value, 1954, and with comparisons, 1949	9	9
8 Value of dairy products sold—100 leading counties, 1954, with comparisons, 1949	11	11
9 Hogs and pigs on farms—100 leading counties, 1954, with comparisons, 1950	12	12
10 Hogs and pigs sold alive—100 leading counties in number sold, 1954; with value, 1954, and with comparisons, 1949	13	13
11 Sheep and lambs on farms—100 leading counties, 1954; with wool production, 1954, and with comparisons, 1949	15	15
12 Sheep and lambs sold alive—100 leading counties in number sold alive, 1954; with value, 1954, and with comparisons, 1949	17	17
13 Chickens, 4 months old and over, on farms—100 leading counties, 1954, with comparisons, 1950	19	19
14 Chickens sold—100 leading counties in number sold, 1954; with value, 1954, and with comparisons, 1949	20	20
15 Chicken eggs sold—100 leading counties in dozens of eggs sold, with value, 1954; and with comparisons, 1949	22	22
16 Turkeys raised—100 leading counties, 1954, with comparisons, 1949	24	24
17 Turkey hens kept for breeding—100 leading counties, 1954	25	25
18 Value of poultry and poultry products sold—100 leading counties, 1954, with comparisons, 1949	26	26
FIELD CROPS HARVESTED		
19 Corn harvested for grain—100 leading counties in acreage, 1954; with quantity harvested, 1954, and with comparisons, 1949	27	27
20 Sorghum for all purposes, except for sirup—100 leading counties in acreage, 1954, with comparisons, 1949	29	29
21 All wheat threshed or combined—100 leading counties in acreage, 1954; with quantity harvested, 1954, and with comparisons, 1949	30	30
22 Oats threshed or combined—100 leading counties in acreage, 1954; with quantity harvested, 1954, and with comparisons, 1949	32	32
23 Barley threshed or combined—100 leading counties in acreage, 1954; with quantity harvested, 1954, and with comparisons, 1949	34	34
24 Rice threshed or combined—50 leading counties in acreage, with quantity harvested, 1954, and with comparisons, 1949	36	36
25 Flax threshed or combined—100 leading counties in acreage, with quantity harvested, 1954, and with comparisons, 1949	37	37
26 Soybeans for all purposes—100 leading counties in acreage, 1954, with comparisons, 1949	39	39
27 Soybeans harvested for beans—100 leading counties, 1954, with comparisons, 1949	40	40
28 Peanuts harvested for picking or threshing—100 leading counties in acreage, with quantity harvested, 1954, and with comparisons, 1949	41	41
29 Land from which hay was cut, excluding soybean, cowpea, peanut, and sorghum hays—100 leading counties, 1954, with comparisons, 1949	43	43
30 Alfalfa cut for hay (and for dehydrating)—100 leading counties in acreage, 1954; with quantity harvested, 1954, and with comparisons, 1949	44	44
31 Irish potatoes harvested for home use or for sale—100 leading counties in acreage, with quantity harvested, 1954, and with comparisons, 1949	46	46
32 Sweetpotatoes harvested for home use or for sale—100 leading counties in acreage, with quantity harvested, 1954, and with comparisons, 1949	48	48
33 Cotton harvested—100 leading counties in acreage, with quantity harvested, 1954, and with comparisons, 1949	50	50
34 Tobacco harvested—100 leading counties in acreage, with quantity harvested, 1954, and with comparisons, 1949	52	52
35 Sugar beets harvested for sugar—100 leading counties in acreage, with quantity harvested, 1954, and with comparisons, 1949	54	54
VEGETABLES (except Irish and sweet potatoes)		
36 Vegetables harvested for sale—100 leading counties in acreage, 1954; with value, 1954, and with comparisons, 1949	56	56
37 Snap beans (bush and pole types) harvested for sale—100 leading counties in acreage, 1954, with comparisons, 1949	58	58
38 Green peas (English) harvested for sale—100 leading counties in acreage, 1954, with comparisons, 1949	59	59
39 Sweet corn harvested for sale—100 leading counties in acreage, 1954, with comparisons, 1949	60	60
40 Cabbage harvested for sale—100 leading counties in acreage, 1954, with comparisons, 1949	61	61
41 Tomatoes harvested for sale—100 leading counties in acreage, 1954, with comparisons, 1949	62	62
42 Dry onions harvested for sale—100 leading counties in acreage, 1954, with comparisons, 1949	63	63
43 Watermelons harvested for sale—100 leading counties in acreage, 1954, with comparisons, 1949	64	64
FRUITS, NUTS, AND HORTICULTURAL SPECIALTIES		
44 Value of fruits, including berries and other small fruits, and nuts sold—100 leading counties, 1954, with comparisons, 1949	65	65
45 Apples—100 leading counties in number of trees of all ages, 1954; with quantity harvested, 1954, and with comparisons, 1950 and 1949	66	66
46 Peaches—100 leading counties in number of trees of all ages, 1954; with quantity harvested, 1954, and with comparisons, 1950 and 1949	68	68
47 Pears—100 leading counties in number of trees of all ages, with quantity harvested, 1954, and with comparisons, 1950 and 1949	70	70
48 Plums and prunes—100 leading counties in number of trees of all ages, with quantity harvested, 1954, and with comparisons, 1950 and 1949	72	72
49 Cherries—100 leading counties in number of trees of all ages, 1954; with quantity harvested, 1954, and with comparisons, 1950 and 1949	74	74
50 Oranges, including tangerines and mandarins--50 leading counties in number of trees of all ages, with quantity harvested, 1954, and with comparisons, 1950 and 1949	76	76
51 Grapefruit—50 leading counties in number of trees of all ages, 1954; with quantity harvested, 1954, and with comparisons, 1950 and 1949	77	77
52 Pecans—100 leading counties in number of trees of all ages, 1954; with quantity harvested, 1954, and with comparisons, 1950 and 1949	78	78
53 Grapes—100 leading counties in number of grapevines of all ages, with quantity harvested, 1954, and with comparisons, 1950 and 1949	80	80
54 Strawberries harvested for sale—100 leading counties in acreage, 1954; with quanitity harvested, 1954, and with comparisons, 1949	82	82
55 Nursery and greenhouse products, flower and vegetable seeds and plants, and bulbs sold—100 leading counties, 1954, with comparisons, 1949	84	84

INDEX

Counties included in Ranking Agricultural Counties, 1954	85

RANKING AGRICULTURAL COUNTIES

Introduction.—This report presents statistics for the leading counties in the United States for selected items. The ranking of counties has been made on the basis of data for the 1954 Census of Agriculture, although comparative data for the leading counties are also shown for the 1950 Census.

The leading counties have been determined on the basis of size of the agricultural resource or production item selected as a basis for making the ranking of the counties.

For most items, data are given for the 100 leading counties. For items for which the commercial importance is centered in a relatively few areas, the ranking has been limited to the 50 leading counties.

Method of ranking the counties.—The leading counties were selected on the basis of the size of the selected inventory, acreage, and production item for the county. The county with the largest total for the selected item of inventory, acreage, or production was ranked first; the county with the next largest total, second; et cetera.

Some tables present the ranking of counties according to two related items. In such cases, the 100 leading counties for one item seldom coincide with the 100 leading counties for the other related item and, in fact, the difference in the rank of counties on the basis of the two items may be considerable. For example, McLean County, North Dakota, ranks 12th on the basis of the acreage of wheat harvested, but ranks 84th on the basis of the production of wheat.

Definitions and explanations.—The definitions given here are limited to a few items. Detailed definitions and explanations for other items will be found in Volume I, Statistics for Counties and State Economic Areas, of the reports for the 1954 Census of Agriculture.

A farm.—For the 1954 and the 1950 Censuses of Agriculture, places of 3 or more acreas were counted as farms if the annual value of agricultural products, exclusive of home-garden products, amounted to $150 or more. The agricultural products could have been either for home use or for sale. Places of less than 3 acres were counted as farms only if the annual value of sales of agricultural products amounted to $150 or more. Places for which the value of agricultural products for 1954 was less than these minima because of crop failure or other unusual conditions, and places operated at the time of the census for the first time, were counted as farms if normally they could be expected to produce these minimum quantities of agricultural products.

The Census date.—The enumeration for the 1954 Census was made in October, November, and December, 1954; while that for the 1950 Census was made in April and May of 1950. Information on inventory items relates to the situation at the time of the enumeration. Data on acreages and production of crops usually relate to the crop harvested for 1954 or 1949. Data on the sales of crops relate to the crop harvested for 1954 or 1949, regardless of when the crop was sold. Data on livestock production and sales relate to the production or sales in 1954 or 1949.

Qualifications of data and rankings.—Data for leading agricultural counties usually indicate agricultural areas of commercial significance and special importance and interest. The group of 100 or 50 leading counties accounts for a significant part of the United States total. The data on leading counties are of special interest to the residents and farmers of the leading counties and indicate some of the salient features of the geographic distribution of agricultural resources and production.

The production of some agricultural products is concentrated in a few areas while that of other products is scattered over large areas. The dot maps for the item presented in connection with the table of leading counties will help show the extent of concentration and distribution of the item. The characteristics of the land, the soil conditions, and temperature, as well as mechanization and improved farming practices such as disease control, seed selection, and use of fertilizer, have been important factors affecting the concentration, intensity, and distribution of production of most agricultural products.

It is important to note that the relative rank of counties is determined on the basis of data for a single year. Special weather and economic conditions existing in 1954 may have had a significant effect upon the relative ranking of a county. Drought, freezing affecting fruit or other production, storms, etc., may have abnormally influenced agricultural conditions and production in some counties. Significant changes in rank of an individual county would result if data for several years were used as a basis for establishing rank.

The ranking of counties is influenced considerably by the size (total land area or total farm area) of the counties. The county may be a leading county because of its size, and not because of the intensity of the production of the selected item in the county.

The ranking of counties on the basis of the best available over-all measure of farm production is shown in Table 2. This ranking of counties is on the basis of the gross value of all farm products sold.

In the case of the production of livestock and livestock products, the arranging of counties was usually on the basis of the quantity sold because adequate data were not available for the quantity produced. However, the ranking of counties would not have been altered greatly if the ranking had been made on the basis of production. For crops, the ranking was usually made on the basis of the acreage harvested. The quantity harvested, for the counties ranked on the basis of acreage harvested, is usually given in the same table, and the relative ranking of the county on the basis of production is shown, provided that the county ranked on the basis of production among the first 100 counties. For crops such as most fruits, for which acreage harvested data were not available, the ranking was determined on the basis of the number of trees of all ages.

Table 1.—TOTALS FOR THE 100 LEADING COUNTIES COMPARED WITH THE UNITED STATES TOTALS FOR SPECIFIED ITEMS: CENSUSES OF 1954 AND 1950

Item		United States, total	100 leading counties, 1954[1]		The leading county		
			Total	Percent of United States total	Name of county or parish	County total	Percent of United States total

Table 1.—TOTALS FOR THE 100 LEADING COUNTIES COMPARED WITH THE UNITED STATES TOTALS FOR SPECIFIED ITEMS: CENSUSES OF 1954 AND 1950—Continued

Item		United States, total	100 leading counties, 1954[1]		The leading county		
			Total	Percent of United States total	Name of county or parish	County total	Percent of United States total
Peanuts harvested for picking or threshing.....acres..	1954..	1,270,386	1,095,748	86.2	Comanche, Texas	34,962	2.8
	1949..	2,725,473	1,779,543	65.3	Comanche, Texas	60,020	2.2
Land from which hay was cut.....acres..	1954..	69,930,058	12,457,994	17.8	Cherry, Nebraska	579,135	0.8
	1949..	65,630,943	11,451,193	17.4	Cherry, Nebraska	511,397	0.8
Alfalfa cut for hay.....acres..	1954..	26,007,771	5,633,063	21.6	Imperial, California	128,668	0.5
	1949..	16,411,977	3,644,748	22.2	Imperial, California	126,616	0.8
Irish potatoes.....acres..	1954..	1,210,872	849,964	70.2	Aroostook, Maine	120,414	9.9
	1949..	1,514,097	894,826	59.1	Aroostook, Maine	127,129	8.4
Sweetpotatoes.....acres..	1954..	261,051	189,911	72.7	St. Landry, Louisiana	35,382	13.6
	1949..	392,291	211,798	54.0	St. Landry, Louisiana	33,911	8.6
Cotton.....acres..	1954..	18,858,145	9,752,598	51.7	Lubbock, Texas	238,649	1.3
	1949..	26,599,263	12,874,932	48.4	Lubbock, Texas	359,548	1.4
Tobacco.....acres..	1954..	1,557,039	1,100,213	70.7	Pitt, North Carolina	36,254	2.3
	1949..	1,532,298	1,054,331	68.8	Pitt, North Carolina	32,096	2.1
Sugar beets for sugar.....acres..	1954..	864,318	765,048	88.5	Imperial, California	51,446	6.0
	1949..	661,517	551,139	83.3	Weld, Colorado	53,271	8.0
VEGETABLES HARVESTED FOR SALE							
Vegetables harvested for sale.....acres..	1954..	3,739,994	1,834,911	49.1	Monterey, California	98,400	2.6
	1949..	3,864,573	1,767,047	45.7	Hidalgo, Texas	104,577	2.7
Snap beans.....acres..	1954..	271,937	199,052	73.2	Palm Beach, Florida	32,968	12.1
	1949..	300,742	205,016	68.2	Palm Beach, Florida	43,050	14.3
Green peas (English).....acres..	1954..	385,507	320,902	83.2	Umatilla, Oregon	48,498	12.6
	1949..	352,386	262,266	74.4	Umatilla, Oregon	47,916	13.6
Sweet corn.....acres..	1954..	608,568	362,383	59.5	Palm Beach, Florida	17,352	2.8
	1949..	625,162	327,710	52.4	Dodge, Wisconsin	12,157	1.9
Cabbage.....acres..	1954..	131,691	94,927	72.1	Cameron, Texas	7,897	6.0
	1949..	153,362	109,171	71.2	Cameron, Texas	11,795	7.7
Tomatoes.....acres..	1954..	439,555	311,309	70.8	Hidalgo, Texas	27,108	6.2
	1949..	486,355	308,115	63.4	Hidalgo, Texas	27,663	5.7
Dry onions.....acres..	1954..	98,330	78,709	80.0	San Patricio, Texas	7,474	7.6
	1949..	108,702	80,325	73.9	San Patricio, Texas	5,859	5.4
Watermelons.....acres..	1954..	417,838	285,301	68.3	Marion, Florida	9,859	2.4
	1949..	366,736	243,037	66.3	Barnwell, South Carolina	11,417	3.1
FRUITS, NUTS, AND HORTICULTURAL SPECIALTIES							
Value of all fruits and nuts sold.....dollars..	1954..	1,198,016,326	976,535,392	81.5	Fresno, California	59,263,317	4.9
	1949..	791,664,538	626,175,133	79.1	Polk, Florida	47,025,062	5.9
Apples, trees of all ages.....number..	1954..	31,843,522	17,934,117	56.3	Yakima, Washington	1,495,426	4.7
	1950..	50,586,262	21,055,664	41.6	Yakima, Washington	1,341,953	2.6
Peaches, trees of all ages.....number..	1954..	36,912,804	26,175,125	70.9	Stanislaus, California	2,295,132	6.2
	1950..	54,461,132	30,941,366	56.8	Spartanburg, South Carolina	2,545,671	4.7
Pears, trees of all ages.....number..	1954..	9,828,529	8,548,504	87.0	Yakima, Washington	1,134,413	11.5
	1950..	12,357,081	9,073,370	73.4	Yakima, Washington	1,131,859	9.2
Plums and prunes, trees of all ages.....number..	1954..	15,048,816	14,090,294	93.6	Santa Clara, California	3,832,694	25.5
	1950..	19,158,450	16,211,623	84.6	Santa Clara, California	4,028,396	21.0
Cherries, trees of all ages.....number..	1954..	10,265,510	9,310,078	90.7	Door, Wisconsin	1,030,275	10.0
	1950..	11,914,607	9,190,366	77.1	Door, Wisconsin	940,403	7.9
Oranges, trees of all ages.....number..	1954..	45,830,524	[2]45,675,009	99.7	Polk, Florida	6,007,258	13.1
	1950..	45,833,176	[2]45,484,172	99.2	Orange, California	5,354,880	11.7
Grapefruit, trees of all ages.....number..	1954..	10,953,481	[2]10,943,042	99.9	Polk, Florida	1,937,934	17.7
	1950..	12,891,443	[2]12,862,989	99.8	Hidalgo, Texas	4,067,688	31.6
Pecans, trees of all ages.....number..	1954..	7,489,457	4,580,818	61.2	Dougherty, Georgia	228,073	3.0
	1950..	10,126,533	5,324,347	52.6	Dougherty, Georgia	252,660	2.5
Grapes, vines of all ages.....number..	1954..	255,084,502	251,472,198	98.6	Fresno, California	77,969,444	30.6
	1950..	294,465,260	284,951,579	96.8	Fresno, California	83,658,421	28.4
Strawberries harvested for sale.....acres..	1954..	80,365	58,449	72.7	Washington, Oregon	3,694	4.6
